TECHNICAL SKILLS

Languages: Ruby, JavaScript, HTML, CSS
Databases: SQL, PostgreSQL
Software/Tools: Rails, ReactJS, Sinatra, jQuery, RSpec, Capybara, Sass, Foundation, Git, GitHub, APIs, JIRA

PROJECTS

(Launch Academy) SeeYouWhen: *seeyouwhen.herokuapp.com*, *github.com/KayliBrownstein/event-planner-voting*
- Allows groups to easily plan events by providing a platform for voting on suggestions;
- React frontend and Rails backend; utilizes the Google Maps API for directions and location information; integrated ActionMailer and SendGrid for emails.

(Launch Academy) Appful: *appful.herokuapp.com, github.com/emlanctot/appful*
- Allows amateur developers to get constructive feedback on their deployed apps by way of user reviews focused on design, concept, and usability;
- Built collaboratively with three peer developers, Appful has a Rails backend, React frontend with custom CSS, and uses Devise for user login and CarrierWave for profile photo uploads.

Farm Alarm: *farmalarm.herokuapp.com, github.com/KayliBrownstein/farmers-market-search*
- Prompts user for their zip code, and returns details for the closest farmers' markets;
- Collaboratively built during a hackathon, Farm Alarm has a React front-end and operates on a Sinatra server; utilizes the USDA's Farmers' Market API and includes a Google Maps link.
